PROFESSIONAL SUMMARY

Computer Science and Engineering (IoT) graduate with hands-on experience in Java, Spring Boot, Servlets, JDBC, SQL, HTML, CSS, and JavaScript through two full-stack development internships. Strong foundation in object-oriented programming, Data Structures & Algorithms, RESTful API development, and database management. Built a Java web application using MVC and the DAO pattern, and delivered an end-to-end IoT and web application integrating embedded sensors with a Django-based live dashboard. Seeking an entry-level Software / Java Developer role to apply full-stack development skills and contribute to production systems.

TECHNICAL SKILLS

Languages: Core Java, Python, JavaScript, SQL
Frameworks & Libraries: Spring Boot, Java Servlets, JDBC, Django, RESTful Web Services
Web Technologies: HTML5, CSS3, JavaScript, Responsive Web Design
Databases: Oracle SQL, MySQL
Tools & Platforms: Git, GitHub, Arduino IDE, IoT Prototyping, Postman
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), MVC Architecture, DAO Design Pattern, REST API Design, RAG & LLM Fundamentals

PROFESSIONAL EXPERIENCE

Full Stack Java Development Intern — TAP Academy *May 2026 – Present*

- Developing full-stack web applications using Java, Spring Boot, SQL, HTML, CSS, and JavaScript, following industry-standard coding and version-control practices.
- Building and testing backend services and RESTful APIs, integrating them with SQL databases for persistent data management.
- Collaborating with a development team to design responsive, user-facing web interfaces and troubleshoot cross-stack issues.

Python Full Stack Development Intern — Sahnar Technologies *May 2025 – Aug 2025*

- Built and debugged Python applications applying object-oriented programming (OOP) principles in a professional development environment.
- Tested and optimized Python-based application modules, improving code reliability and performance.
- Strengthened problem-solving and debugging skills through hands-on application development and code reviews.

PROJECTS

LUDO Food Delivery *Java | Servlets | JDBC | MySQL | HTML | CSS | JS*

- Developed a full-stack food delivery web application in which users play a Ludo game to win discount coupons, combining online ordering with gamified customer engagement.
- Implemented the backend with Java Servlets and JDBC following the MVC architecture, keeping the model, view, and controller layers separate and maintainable.
- Applied the DAO design pattern to isolate MySQL database operations from business logic; built the front end and Ludo game logic with HTML, CSS, and JavaScript.

Real-Time Boarding Data System for Railway Reservation *IoT | HTML | CSS | JavaScript | Django*

- Engineered an IoT-based passenger monitoring system using Arduino Uno R3 and IR sensors to count passengers entering and exiting train coaches in real time.
- Displayed live occupancy data on an external LED/LCD board and transmitted sensor data over Wi-Fi to a backend web application.
- Developed the companion web application with HTML, CSS, JavaScript, and Django, allowing passengers to view live occupancy across all train coaches from a single dashboard.
- Extended the system architecture to push live passenger-count data to the web, evaluating Firebase and MQTT/Node.js/Socket.io for the real-time backend.

EDUCATION

Bachelor of Technology, Computer Science & Engineering (IoT) *Apr 2026*
GITA Autonomous College, Bhubaneswar, Odisha — CGPA: 8.10 / 10

12th Board (Science) *Jul 2022*
Talanagar H.S. School, Balasore, Odisha — 79.5%

10th Board *Jul 2020*
S.S.V.M, Cuttack, Odisha — 75%
